

# Probe Holder X

Revision 1.0

The Probe Holder X is the most sophisticated third hand for reliable and stable measurements with oscilloscopes and multimeters.

Thanks to its heavy tripod and the four flexible joints stable measurement in any position is possible. The versatile clamp allows mounting of a broad variety of probes.

## Features:

- Versatile clamp compatible with most oscilloscope and multimeter probes. Requirements: shaft diameters from 4mm to 12mm; minimal shaft length 22mm
- Arbitrary positioning thanks to the flexible joints and the clamping screw.
- Heavy tripod stand with a weight of 400g.
- Temperature range: -20°C to 40°C
