

## Probe Holder L Revision 1.1

The Probe Holder L is the most used third hand for reliable and stable measurements with oscilloscopes and multimeters.

The two feet and the tip of the probe build a tripod, which guarantees a stable positioning of the probe. The versatile clamp allows mounting of a broad variety of probes.

### Features:

- Versatile clamp compatible with most oscilloscope and multimeter probes.  
Requirements: shaft diameter from 4mm to 12mm; minimal shaft length 22mm
- Arbitrary positioning thanks to the three flexible, self clamping joints.
- Temperature range: -20°C to 40°C
